REPLENISHER

Clean systems run better.

CLEAN the Hydraulics, RESTORE Oil Protection

with *DECON™ AW* & *ZF*.

Exceptional Deposit Control • Extend Fluid Life & Performance • No Risk Guarantee

Part of the *DECON™* family, *DECON™ AW* (Antiwear) and *DECON™ ZF* (Zinc-Free) are tailored for hydraulic systems in manufacturing, power generation, pulp & paper, wind and marine industries. They dissolve varnish, replenish antiwear additives, and extend oil life, all powered by our patented *Solvancer®* technology for maximum performance and minimal downtime.

FLUITEC

Hydraulic systems must stay clean to prevent unplanned downtime of essential equipment. **Contaminants and deposits can cause serious problems**, while wear quickly depletes antiwear additives—forcing frequent oil changes.

Maximize Oil Life. Minimize Downtime.

We engineered **DECON™ AW** & **DECON™ ZF** to replenish essential antiwear additives and keep your hydraulic oils clean, while adding an extra layer of protection to your equipment. These solutions help extend oil life without compromising quality.

We designed these products to:

- Remove oil degradation by-products
- Replenish critical antiwear and antioxidant additives

The result? Longer oil life, lower maintenance costs, and a reduced environmental impact for hydraulic systems.

Defend Your Hydraulics with Proven Deposit Control

DECON AW and **DECON ZF** are industrial lubricant deposit removers and oil system cleaners designed specifically for hydraulic systems. Use **DECON AW** in any hydraulic system, while **DECON ZF** is ideal for systems that require **zinc-free** lubricants.

Powered by patented **Solvancer®** technology, **DECON AW** and **DECON ZF** quickly dissolve varnish and organic deposits from machine internals. They decontaminate material assets, reduce

varnish potential, and protect against sludge and deposits over the long term—leaving no residues as they degrade.

They also replenish critical antiwear and antioxidant additives that hydraulic oils often lose. Global manufacturers and plants rely on **DECON AW** and **DECON ZF** to boost efficiency, reduce downtime, and improve their bottom line.

reliability

No shutdowns. No surprises. **Just results.**

We designed **DECON™ AW & ZF** to deliver unmatched value in hydraulic oil care. With simple application, flexible use, and proven compatibility, these solutions extend oil life, reduce maintenance, and protect your investment—keeping your equipment running reliably while saving you time and money.

- **Ready to Use**

Just add a small dose to your system—no shutdown needed.

- **Flexible Application**

Add **DECON AW** or **ZF** before an oil change or use it to clean the system and avoid an oil change altogether.

- **Peace of Mind**

DECON AW and **ZF** work with lubricants and hydraulic oils formulated with API Group I to IV base stocks without impacting oil or additive performance.

- **No-Risk Guarantee**

Rest assured—**DECON AW** and **ZF** don't affect lubricant performance, including oxidation stability, anti-wear, gear loading, demulsibility, foam, or air release.

- **Exceptional Deposit Control**

Quickly dissolves deposits including varnish and sludge from servos, valves and more in hydraulic systems while resisting re-adhesion.

- **Extended Drain Performance**

Replenishes antiwear and antioxidant additives to extend oil life and reduce maintenance.

- **Bottom Line Results**

Helps you maximize efficiency and profitability.

Applications

DECON AW & DECON ZF are oil-soluble cleaners that work across a range of hydraulic systems. **DECON AW** fits manufacturing plants, agricultural machinery, mining equipment, and plastic injection molding machines. **DECON ZF** suits hydraulic systems that need zinc-free or ashless solutions—like those in paper mills, marine applications, and equipment requiring extra compatibility.

Fill4Life™ Solution

Patented solutions for fluids that last as long as your equipment—no oil changes, no flushes, no unexpected issues. Just less downtime, lower maintenance costs, and longer equipment life.
